

## UNIT C - 04 Line

2	BEDROOMS + DEN	3	BATHROOMS	
INTERIOR TERRACE		1,961 SF 210 SF		182 M² 20 M²
TO	TAL	2,17	1SF	202 M <sup>2</sup>

All dimensions are approximate and all floor plans and development plans are subject to change. Stated square footages and dimensions are measured to the exterior walls and the centerine of interior dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior structural components and other common elements). This method used herein is generally found in sales materials and is provided to allow a prospective buyer to compare the Units with units in other condominium projects that utilize the same method. The square footages of the units, as determined under both methods, can be found in Exhibit 2 to the Declaration of Condominium. Terraces are Limited Common Elements, but are not part of the Unit Measurements of rooms set forth on this floor plan are generally taken at the farthest points of each given room (as described above and as if the room were a perioduct obtained by multiplying the stated length and office on the condominium projects that the farthest points of each given room (as described above and as if the room were a perioduct obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typically be smaller than the product obtained by multiplying the stated length and office of the actual room will typical
